ADVANCED MANUFACTURING - A NEW ERA

- **iControls**
- Phase 1 Complete - >£500k investment already made
- Resources Secured and Marketing Campaign underway
- Innovative Manufacturing Processes in Development
- Demand - Nuclear and Energy Sector Markets
- Research and Development Lab - specifically to address Nuclear Decommissioning Challenges

System Integration
Onsite Support
Control Panel Build and Supply
Fully Supported LTQR Packs and Quality Grade 2
Compliant

INTELLIGENT PRODUCTS

INNOFLOW
SOLUTIONS

- Sensors, Transducers and Measurement Instrumentation within all flow mediums
- Partnership with current market leaders - Endress and Hauser
- Global technical and consultancy reach with E-Commerce and WWW Strategy with Matrix Optimisation
- Inter-company selling thus maximising market opportunity and profiling
- Design solutions around key products concentrating on Instrumentation and Process Control for the Energy Sector
- Early Stages of Development yet winning contracts in Oil and Gas

A close-up photograph of a small, vibrant green seedling with four rounded leaves emerging from parched, cracked brown earth. The seedling is positioned slightly to the right of the center. The harsh, dry texture of the soil contrasts with the smooth, healthy appearance of the plant, symbolizing growth despite adversity.

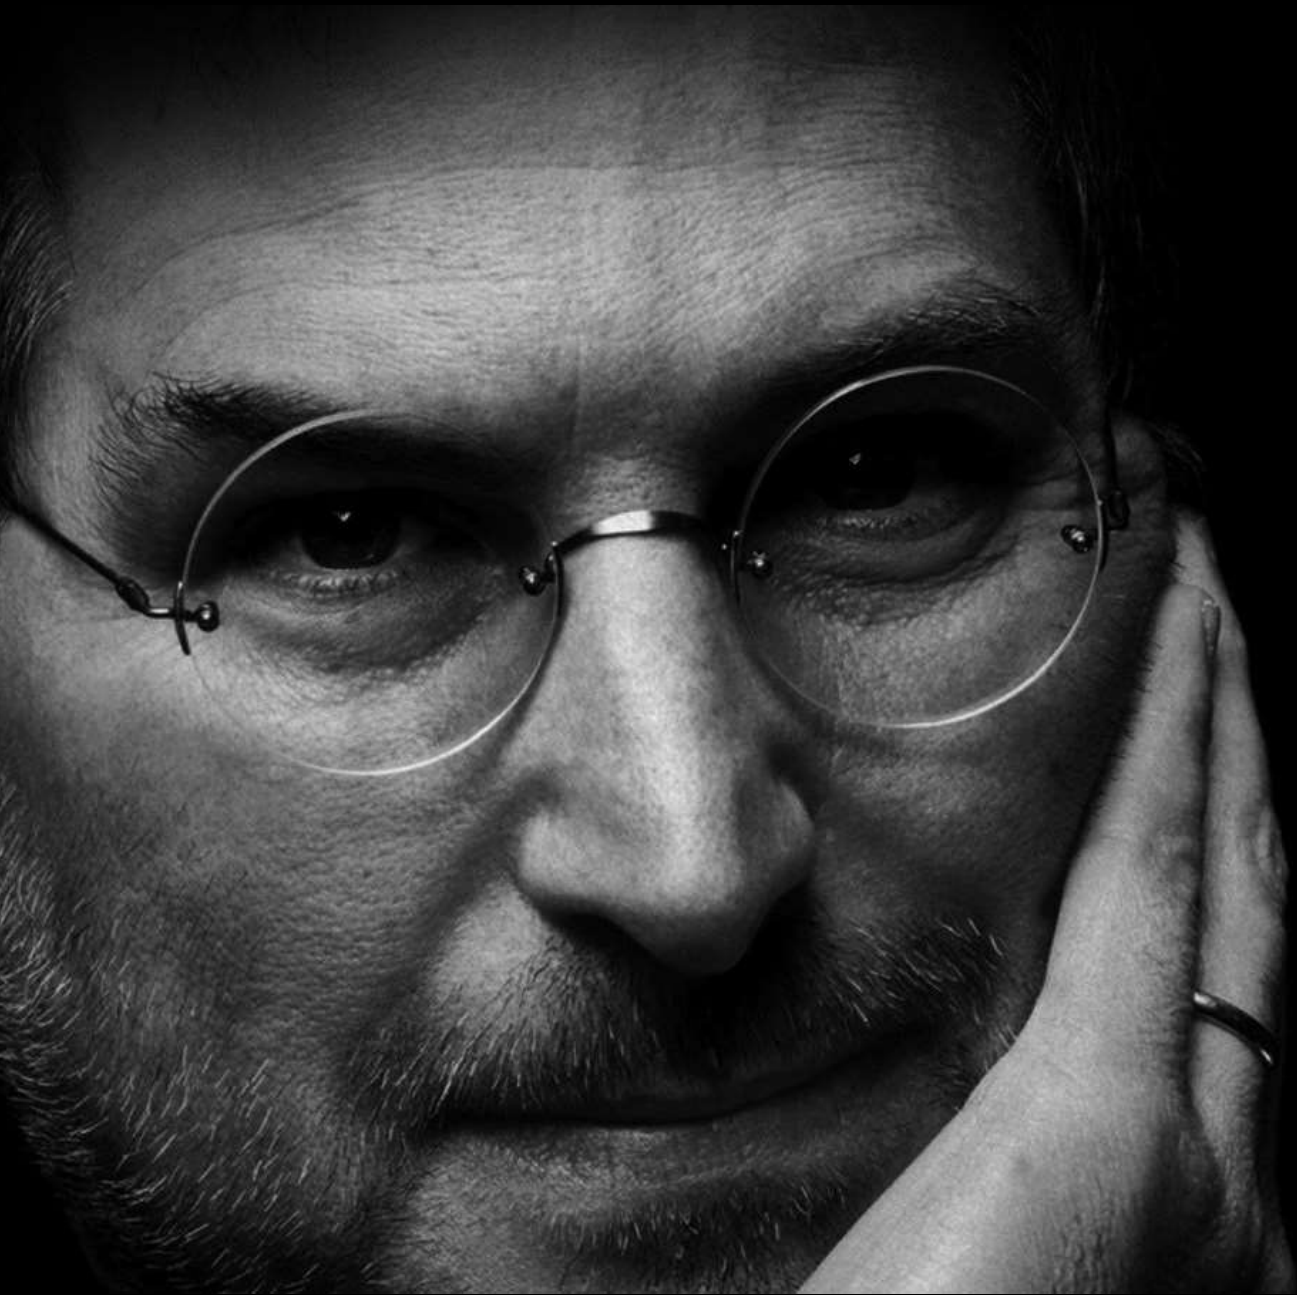

“Without investment there will not be growth, and
without growth there will not be employment”

—MUHTAR KENT

THE VISION

- 
- A photograph of a mountain landscape at dusk. In the foreground, a glowing orange tent is pitched on a rocky shore. A calm lake reflects the colorful sky and the surrounding mountains. The sky is a mix of deep blue, purple, and pink, with some clouds. The mountains are rugged and partially covered in snow.
- Is the Summit the Future...
Delivery and Business Plan Modelling
 - Group Complex allow growth for all companies with a potential £2M+ Project
 - Specialist Instrumentation Lab for InnoFlow Solutions
 - Specialist SCADA / DCS Suite for iControls
 - State of the art Visualisation Tools leading to 4D developments
