

# UK REGIONAL COLLABORATION

# The first multi-regional collaboration agreement for the UK

Signed on 6<sup>th</sup> November 2019 at Britain Energy Business Cluster's Global Reach event in Manchester

An agreement to support export capability and investment potential for the UK's key energy regions

## Areas for collaboration:

- Innovation and productivity
- Support to inward investment & export
- Promotion of regional export capability
- Co-ordination on the Place Agenda within the Nuclear Sector deal
- Sharing of best practice

# Our Vision

- **The UK is home to the full spectrum of clean energy sources**, from nuclear to renewables, which will play an essential role in achieving the government's clean energy targets
- Each region has their strengths, experiences and available resources to inform the development of the sector
- Regional business clusters and supply chain organisations represent the engines that allow the UK industry to supply clean energy solutions to worldwide markets
- **We have a focus on levelling-up the UK's energy regions** to unleash Britain's potential in the international energy market, bringing prosperity and resilience to the UK's supply chains and communities

# Taking the first steps to establish a Regional Voice

## DIT Civil Nuclear Showcase 2020

- First-of-a-kind Regional Fringe Event, representing the entire regional landscape of civil nuclear in the UK to an international audience
- Presentations and open inter-regional panel discussion

## Advocating a strong representation of regional voice within the Nuclear Sector Deal's Place Agenda

- Establishing 'Place' as part of the Nuclear Sector Deal's delivery plan
- Securing a voice within the Nuclear Industry Council and its Next Gen Council
