

HOW TO BECOME A CERN SUPPLIER

STEP BY STEP

Why should your company register?

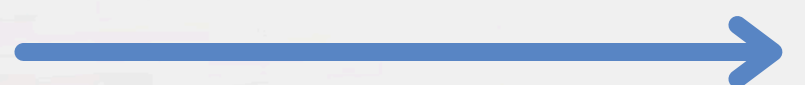

-  It's the first step to becoming a CERN supplier.
-  It allows CERN to assess your company's capabilities and match them to relevant procurement needs.
-  It increases your visibility for future tender opportunities.

Step 1: Visit the Registration Page

You'll find all the guidance and links you need to get started.

<https://procurement.cern.ch/asp/Registration>

Step 2: Complete the Online Form

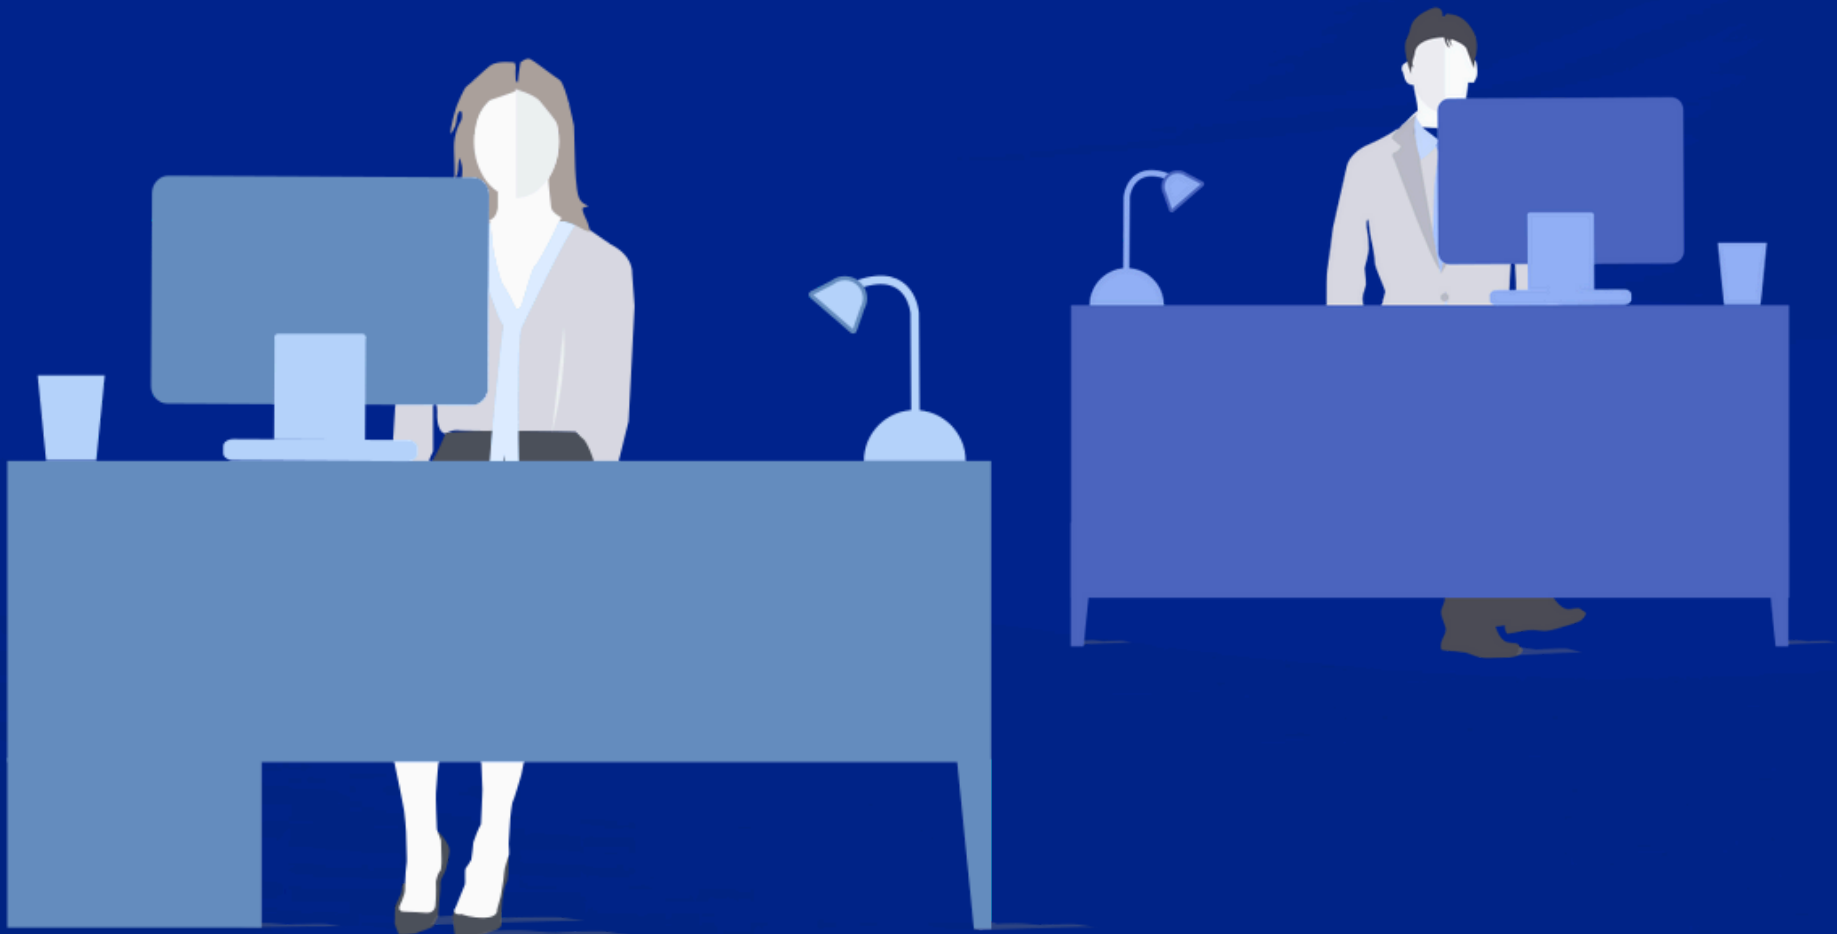

Fill in the online form with your company details:

 **General information**

 **Country and contact details**

 **Banking details**

 **Be accurate and clear: this is how CERN identifies potential suppliers.**

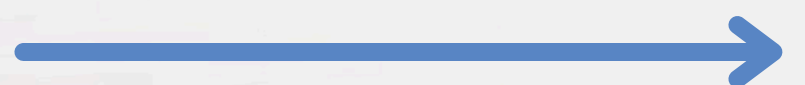

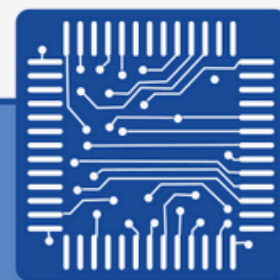

Step 3: Select Product or Service Categories

Choose relevant categories for your activity.
CERN uses this to match suppliers to calls for tenders.

 Categories include:

- Civil Engineering
 - IT & Computing
 - Electrical & RF Equipment
 - Mechanical Engineering
- ... and more!

Step 4: Submit and Confirm

Almost there!

Submit the completed form.

You'll receive a confirmation by email.

Your company is now visible in CERN's supplier database.

Submissions are subject to approval prior to being registered in the database.

What Happens Next?

Being in the database means:

CERN may contact you for market surveys or calls for tenders.

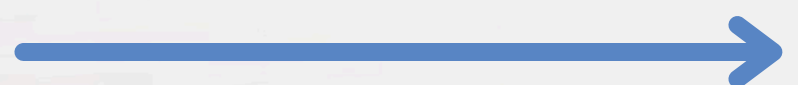

You're part of a pool of suppliers in your sector.

Keep your profile updated!
