

LEV TESTING – IT’S THE LAW MAKE SURE YOU ARE GETTING YOURS DONE!

Shepley have qualified engineers who can competently carry out LEV testing and inspections for all makes and types of extraction equipment.

Our expert analysis allows us to provide practical advice and recommendations.

We also provide a comprehensive test report which conform to HSE standards

LEV systems **MUST** be tested once every **14 months!**

CoSHH Regulations require most of the following systems to be LEV tested:

- Oil Mist
- Welding Fume
- Smoke and Dust Extraction Units

“12,000 lung disease deaths each year are estimated to be linked to past exposures at work”

(HSE, 2019)
