

Course Aim

The programme has been developed as a standalone programme that provides a 'taster' for new entrants in the Business Improvement arena. It covers the full scope of initiating, planning and conducting a business improvement activity in an organisation and provides the candidates with insights into the range of tools that can be used to improve business operations. It adopts a blended approach to learning; combining face to face practical sessions with online tutorials and coaching sessions that further underpin the theory and practice they have acquired.

Workshops Information

There are 7 full day workshops planned which will explore the key concepts of Quality improvement, tools and techniques that are typically used and their application in business.

These workshops will be predominantly practical in application where candidates get an opportunity to put these concepts into practice. They will include a mixture of tutor input, group discussions and both individual and group activities to reinforce the concepts learned and underpinning personal and team development which is key to developing improvement cultures in organisations.

Exercises will be designed to suit a range of ability and experience and will offer candidates the opportunity to 'stretch' themselves in terms of their learning based on their starting points and also the learner's ability to cope with challenge. Feedback will be provided to candidates so they can apply this to future sessions. tutor feedback, typically provided via learning journals.

Tutorials

Tutorials have been incorporated into the schedule to help the candidates 'assimilate' the information they have received and to apply this to their own business improvement project. Part of this tutorial space will include pastoral checks to ensure that candidates are coping with the demands of the course and their business improvement project.

Final Workshop

Candidates will also be asked to submit a project report in an appropriate format (typically a written report or a recorded presentation) as part of their final assessment, and to give a brief (5-10 minutes) overview of the project and the outcomes/ potential outcomes from it during the final workshop.

The final workshop will cover final programme content, sharing of project outcomes and a review of the programme and outcomes for candidates.

Studying this Skills Bootcamp course costs £2,998 per learner.

Employer Costs

- Large employer at 30% (£899.40) contribution. This is fantastic value for money with a 70% reduction.
